📍 Uttara, Dhaka, Bangladesh

Computer Science graduate from Independent University, Bangladesh, with hands-on experience in Python, Linux environments, network configuration, and technical support. Background spans software development, system administration, and infrastructure operations, with a focus on troubleshooting and cloud technologies. Interested to join software development, system administration, or network engineering roles.

SKILLS

Databases: MySQL, PostgreSQL, Redis

Programming Languages: Python, Go, Solidity, JavaScript, SQL

Operating Systems: Ubuntu (primary), Linux Server, Windows

DevOps & Tools: Docker, Git, GitHub, GitLab, Bash Scripting, Prometheus, Grafana

Blockchain & Web3: Ethereum, Web3.py, Smart Contracts, DeFi Protocols, On-chain Data Analysis

Systems & Networking: Linux, VMware, TCP/IP, IP Addressing, Subnetting, VLAN, Network Configuration

EDUCATION

Independent University, Bangladesh

B.Sc. in Computer Science — CGPA: 3.31

Jan 2021 – Dec 2025

Dhaka, Bangladesh

EXPERIENCE

Network Support Engineer

Netwave Solution -ISP

Jan 2026 – Present

Dhaka, Bangladesh

- Configured and maintained network infrastructure for an ISP environment serving **300+ users**, including routers, switches, and access points. Diagnosed and resolved LAN and wireless connectivity issues.
- Performed IP addressing, VLAN configuration, and network adjustments to support infrastructure operations.

Research Assistant

Independent University, Bangladesh

Jan 2021 – Dec 2025

Dhaka, Bangladesh

- Authored and published **two peer-reviewed conference papers**, including one as **first author**
- Decentralizing Reputation Scoring Using Blockchain Behavioral Data and Machine Learning — [IEEE ICAISET 2026](#)
- Enhancing Consumers' Financial Accessibility with Blockchain-Powered Credit Scoring: A Decentralized Method for Approval of Personal Loans — [IEEE BCCA 2025 \[Certificate\]](#)

PROJECTS

LegalConnect-AI-Powered Legal Solutions | [Source Code](#) | [Demo Video](#)

- Legal consultation app for communicate directly with Lawyer and Advocate using our platform
- Built a retrieval-augmented (RAG) chat assistant for legal users by embedding statutes/case docs into a vector store and retrieving top-k passages to ground LLM responses with citations and improving answer relevance.

KeyLM-Bring Your AI | [Source Code](#) | [Live Demo](#)

- Built a unified multi-provider AI chat workspace supporting OpenAI, Gemini, and Anthropic with a Groq free fallback for seamless model switching.
- Implemented secure BYOK key management with AES-256-GCM encryption, model auto-discovery, streaming responses via SSE, and token usage tracking using Next.js, TypeScript, PostgreSQL, and Prisma.

Inter-VLAN Configuration Lab — [Source Code](#)

- Designed an IP addressing scheme for university departments and configured Inter-VLAN communication in a lab environment.
- Implement subnet planning, segmentation, and routing validation for multiple organizational units.

Infra-monitoring - Grafana | [Source Code](#)

- Built a real-time infrastructure monitoring stack for KeyLM using Prometheus and Grafana, tracking OS, database query, and Go runtime metrics.
- Orchestrated multi-service deployment with Docker Compose, enabling live observability dashboards at a production environment.

CERTIFICATIONS

Therap JavaFest-2025 [Finalist-Top10] — [Certificate](#)
